hp everyday photo paper, semi-glossy

HP Everyday Photo Paper delivers photo-quality gloss at an affordable price. Specially coated for colour-rich photo printing, it's heavier and thicker than plain paper and ideal for photo proofs, test prints and images from email and internet.

Designed for home and small business users who want a glossy photo paper that delivers noticeably better results than plain paper, but is also so economical that it can be used for everyday photo printing applications.

Noticeably better results than plain paper

- Substantial 170 g/m² weight and a good sturdy feel deliver an instantly better first impression.
- With a semi-glossy finish on one side and a textured finish on the reverse, prints have far more of the look and feel of traditional photographs.
- Good opacity ensures that pictures won't show through on the other side.
- Quality feel adds extra impact to anything you print from photos to scanned drawings and presentations.

Perfect for everyday photo printing

- Designed to accept the colour-rich photo printing modes of today's inkjet printers
- Special surface coating ensures brilliant colours and rich blacks for great results every time.
- Textured back coating helps prevent sticking when paper is stacked in output tray.
- Optimised for use with HP inks and HP inkjet printers to deliver prints that are always clear and always sharp.

Exceptionally good value for money

- This is HP's lowest-priced glossy photo paper, offering unbeatable quality for such a competitive price.
- So affordable it can be used for all photo printing applications, from proof sheets and presentations to kids' photos – the glossy alternative to plain paper.
- Ideal for printing images downloaded from the web or received by email
- Designed for regular use – supplied in convenient packs of 100 A4 sheets
